

This was a very insightful class, that has opened new windows in my mind.

The Trainer Combo - was also a WFT, Doug ~~being~~ I liked the ~~escap~~ examples you gave related to math and the brain & neurons.

And on the other hand Michelle came in ~~brought~~ Rep the focus ad time ad gave all the tips how to do it

THANKS GUYS 😊

The team activities and discussions were where I probably learnt the most as it was typically practical application of the Scrum framework.

I think the course supposes that you have some previous Scrum exposure which maybe should be mentioned in the course notes

Good Things

- The class was very informative.
- Instructors worked very well together in explaining information to the class.
- The good cop / bad cop roles worked well.

Needs Improvement

- more upfront detail before activities begin

- Great coverage of philosophy and background concepts
- Activities were very useful and fun
- Two instructors was valuable; provided interesting variations in viewpoints
- Two instructors had ~~an~~ an infrequent tendency to cause deviations and distractions.
- A more structured agenda might help students to be aware of topics that can/will be addressed later in the course ... to avoid distracting questions
- Pre-Course prep should be required.
- Would like to have seen more concrete examples & guidelines
- Great course. Thank you

Thank You both very much!

I gained a lot of valuable information from this course. I enjoyed the practical applications that showed the value of SCRUM. Sorry, I am horrible at putting words down on paper. But, truly, thank you!

Heath

"What went well:"

I think it was great to have 2 instructors. It helped shed light and diff. opinions on handling situations

AND
the 2nd instructor could re-word an explanation if we were having trouble.

"What could have been better":

I think that we got better @ time boxing questions during the presentations around Project management.

I also would have liked to have spent more time on estimating stamps (points versus hours)

AND helping mgmt more time on switching paradigms to Agile from waterfall.

GREAT CLASSES

Thanks—

I am glad that I was part of the Serum master class and I enjoyed so much as a team learning the framework. The instructors Doug and Michele were fabulous clarifying all the questions we had part of the discussion and I liked their approach that they kept the class very alive and interesting. Thank you for the wonderful experience and knowledge.

Appreciated

Thank you
RAMESH.

EMAIL: RAMESHLOGIC@HOTMAIL.COM

When you said we would
walk out of here with heads
full of mush, you were right.
Just like a baby learning to
walk, I know I will need
to keep learning & applying.
Very informative to a novice,
yet feel I can really apply
the concepts immediately.
