

Dear Doug,

I enjoyed your class especially the real world examples. I believe they are the best way to convey concepts and allow folks to see patterns in their own environment and then react.

I think it could be useful to perhaps have more information on the metrics and practices for reporting on Scrum progress. This would be especially useful to help those steeped in **PMI** to bridge their knowledge.

Regards

Mike Doherty

Doug,  
Thanks for a  
great class.

Yana  
Yana-polyakova@mcabell.com.

Good class. Lots of stories & experiences that  
I can use  
Thanks

Doug,

First, awesome name...  
had to say it.

Thank you, I feel like I am  
walking out with a solid base  
upon which to build upon and  
look forward to starting the use  
of these practices.

Safe travels and I'll  
look for you on the  
next round of training.

Sonja

## Positives

- ① Group discussions and varied experiences added to positive experience.
- ② Very good team exercises

## Areas for improvement

- ① It felt that some discussions went longer than it should
- ② ~~It~~ Would've liked to talk about how Scrum masters can help Product Owners

## Feedback on Screen class

I enjoy the group exercises and sharing of experiences. Doug was good at getting us to answer our questions, that's walking the walk. Overall, I think I got something useful out of it.

Thanks Doug for the class. I really enjoyed it and found it to be good value.

I would suggest that name tags or name placemarkers are used. I didn't catch all the names when they introduced themselves on the first morning.

Best of luck,

John Roberts
