Comments:

The course was different than I expected, but in a good way. It focused on the human element and human behavior, as opposed to more of an evangelical approach. I expected someone to tell me what to do, but I pleasantly surprised. I enjoyed the class and learned a great deal. I am very happy I signed up.

It would help to have
a project from idea to
completion. That way the
whole class can follow
same steps & see
Scrum in use.

VERY THOROUGH PRESENTATION OF MATERIALS.
REAL LIFE EXPERIENCES WERE VERY USEFUL
IN PROVIDING CLARITY ON HOW TO USE
SCRUM TECHNIQUES.
SCRUM EXERCISES WERE VERY USEFUL
IN HAMMERING HOME THE ESSENTIALS.

- Good focus on the psychology of people and groups, I hope we get the links to some of the papers.
- a few too many biology/chemistry references. Not a field I can relate to well.
- Loved the \$35⁰⁰ concept. will definitely use that

Would have liked to see more theory (ie. planning, estimating - the non-interpersonal stuff that we have to deal with). I like the scenarios but so much of that is difficult to plan for - But, important to think about.

~~Would like to learn more of the mechanics and I realize this is an ongoing thing, so, all things considered, the class was good~~
